fluencetech.com

Industry: Chemical formulation, manufacturing and distribution

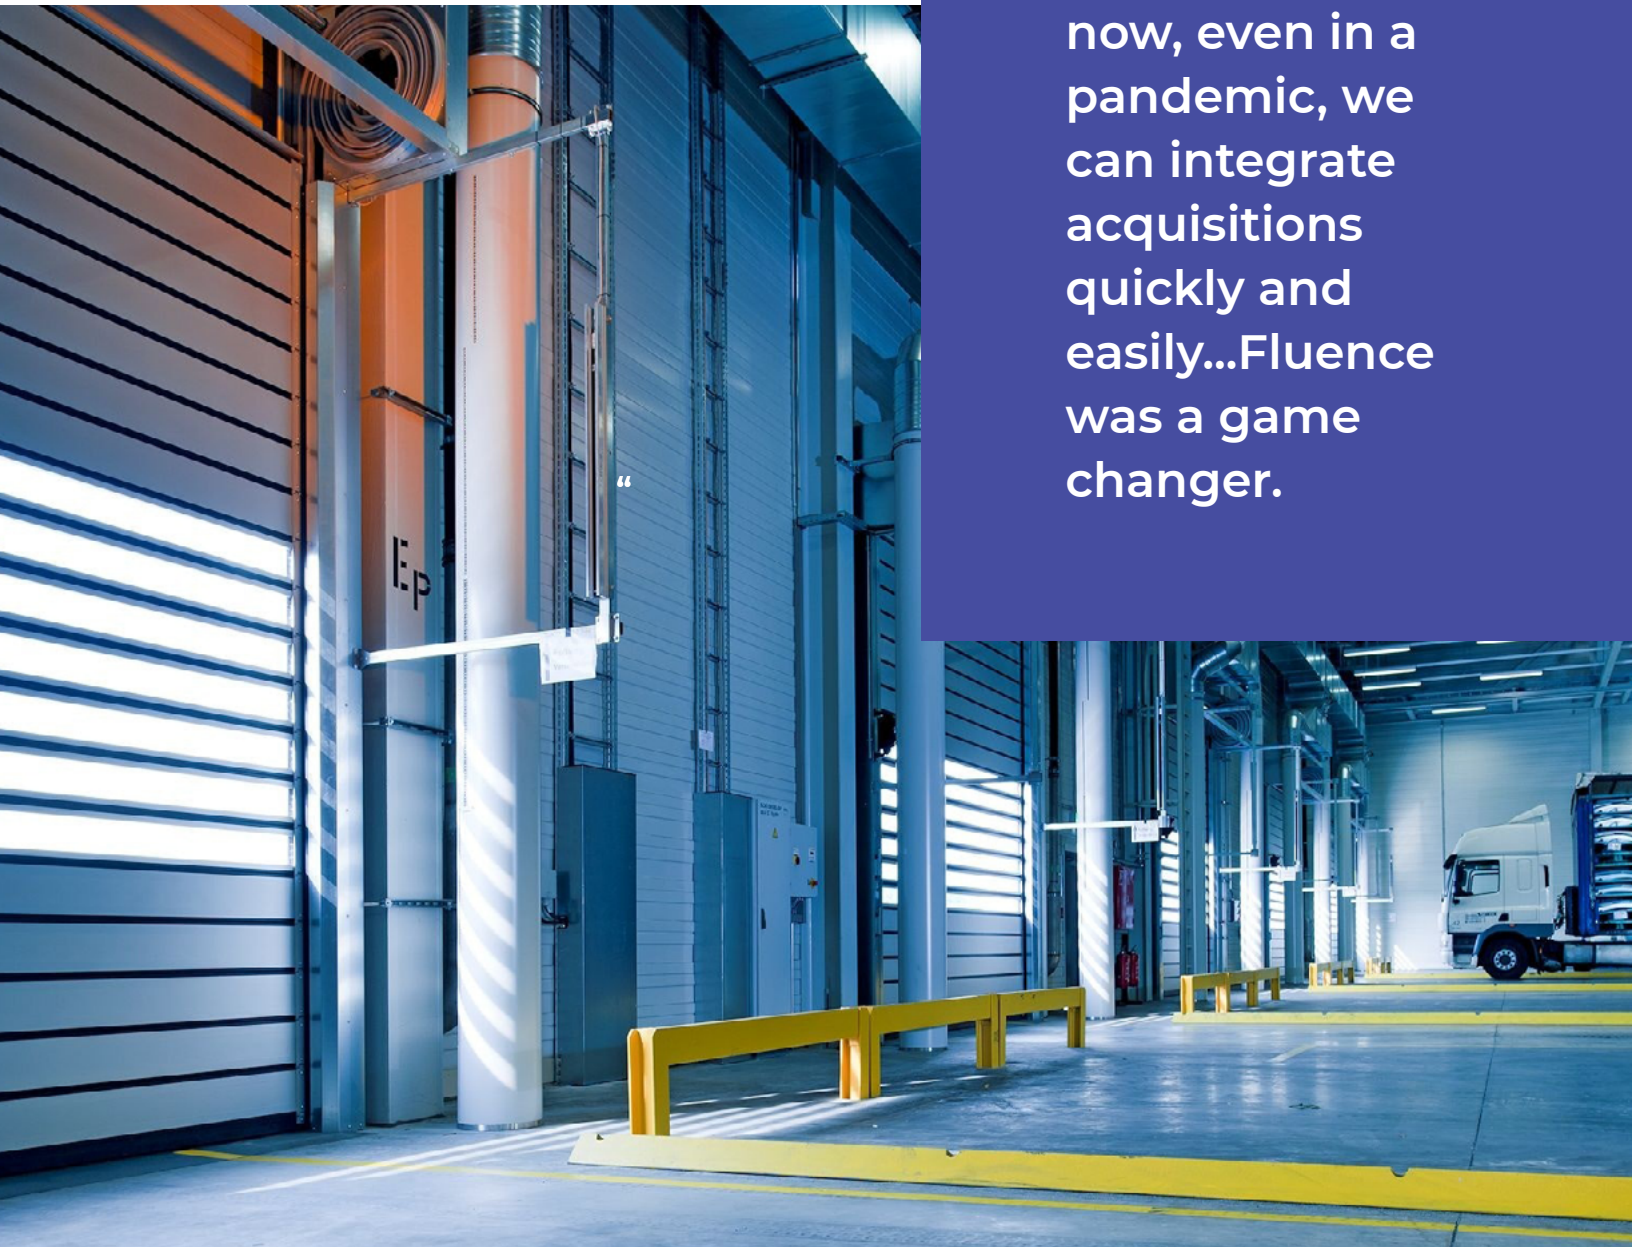

Size: 1,000 employees

Location: Montreal, Quebec

Existing software: Microsoft Excel and Access

“

Consolidations used to be painful but now, even in a pandemic, we can integrate acquisitions quickly and easily..Fluence was a game changer.

93%

FASTER CONSOLIDATIONS AND REPORTING

RESULTS AT A GLANCE

- Faster time to close
- Trusted numbers
- Manual task automation
- Agility to adapt and focus

“With most software we almost needed a PhD in coding. We needed something more intuitive and flexible. Something our accountants could own, not be held hostage by IT.”

- Controller

THE NEED

- To combat COVID, this company retooled to focus on hand sanitizers, and needed its accounting processes to adapt with the shift.
- Already the company was growing quickly through acquisitions, each involving new accounting systems and processes.
- It used to take a month to close the company books and produce (sometimes unreliable) financial reports.

WHY FLUENCE

- This chemical manufacturing company needed a solution that was quick to implement, deploy and adopt among global accounting stakeholders.
- With acquisitions, the company needed to integrate disparate ERP systems, ledgers, subledgers and processes.
- Finance needed a solution they could own, without relying on IT for custom reports and other needs.

THE SUCCESS STORY

- The accountants deployed and adopted Fluence in days, not months typical of traditional software.
- What used to take a month- closing and reporting- took just 2 days in the first month using Fluence.
- The company successfully retooled operations and accounting processes to focus on fighting COVID-19.

A Performance Management Revolution

Fluence is purpose-built for finance teams that want cutting-edge efficiency and enterprise-caliber data, without the overhead traditionally associated with consolidation and planning systems.
